

Z-LASER

An Exaktera Company

Visibility: Unmatched. Productivity: Maximized.

Laser Projector ZLP2-HighPower by Z-LASER:
The new standard for laser projections under
the most demanding conditions.

www.z-laser.com/ZLP2-HighPower

Taking laser projection to a new level.

Now with 50% better visibility:
The new ZLP2-HighPower.

Groundbreakingly bright and impressively robust: Our new ZLP2-HighPower laser projector provides you with sustainable support for improving manufacturing processes and product quality.

Experience the difference

The ZLP2-HighPower laser projector not only impresses with its particularly robust and high-quality workmanship. At the heart of the device a more powerful laser source, innovative mechanics and modernized electronics ensure unparalleled performance.

For you, this means radiant brightness, pinpoint precision, and impressive durability. Even under the most demanding conditions, such as difficult lighting conditions or mounting at great heights, the ZLP2-HighPower will exceed your expectations!

Visibility

50 % better: Use the projector flexibly even in complex applications.

Precision

More accurate projections: Optimize your product and manufacturing quality.

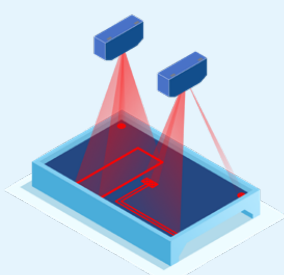

Efficiency

Optimized performance & speed: Complete projects faster and smoother.

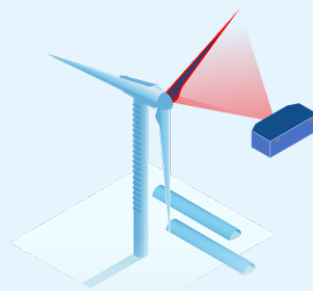

Longevity

Robust workmanship: Reduce costs and maintenance.

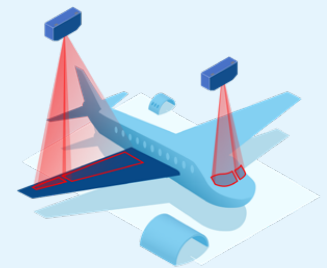

Concrete and building elements

- More efficient alternative to templates
- Display formwork elements and recesses more accurately

Production of rotor blades for wind turbines

- Up to 30 % optimized productivity
- Precise laying of the fiber mats

Aerospace industry

- More accurate material alignment
- More precise tool positioning during assembly

Best visibility for your success:
We look forward to your inquiry
